The 36m SilverYachts 36m Reduce is a groundbreaking superyacht catamaran that redefines space and livability in the 35–37 m segment. With striking exterior lines by Espen Øino and interiors designed to feel like a bright, luxurious residence at sea, she offers an unmatched sense of openness and comfort.

Built in lightweight aluminium with a double hull, Reduce delivers superior strength, efficiency, and stability compared to traditional monohulls, while her shallow draft allows access to secluded bays. The wide profile and expansive three-deck layout create generous areas for sunbathing, lounging, dining, and socializing, including a transformable aft pool and sunpad that can double as a seating area.

INSIDE LAYOUT

Inside, the spacious, light-filled interiors make full use of the platform's breadth, accommodating up to four guest suites plus a master cabin, all with en-suite facilities. Large saloons, dining areas, lounges, and a fully equipped galley provide true superyacht comfort while maintaining a strong visual connection with the outside. Modern, stylish, and exceptionally versatile, Reduce is designed for long-range cruising with unparalleled exterior and interior spaces dedicated to relaxation, entertainment, and life on the water.
