CABINS: 2	Fiberglass		LOCATION: Genoa, Italy

Ameli is a 2005 Mochi Craft Dolphin 44', refitted in 2024, that perfectly embodies the timeless elegance and artisanal quality of the iconic Italian shipyard. Measuring 13.60 meters, she reinterprets the classic lines of the American lobster boats with a refined retro style and distinctive character.

Built in fiberglass with a planing hull, she offers stable, safe and comfortable navigation even in more demanding sea conditions. Powered by twin 575 HP Volvo Penta engines with approximately 1,500 engine hours, she cruises effortlessly at 26 knots and reaches a top speed of 32 knots, delivering both reliability and performance.

A TIMELESS MEDITERRANEAN ICON

Her spacious teak cockpit is seamlessly connected to the saloon through a disappearing glass partition, allowing the interior and exterior to merge into a single open space or remain enclosed and fully air-conditioned for maximum comfort in any season. The layout has been intelligently designed with the full-beam master cabin positioned amidships to enhance stability and comfort while underway, complete with en-suite bathroom and generous storage. The forward guest cabin features a French double bed plus an additional single berth, also with private facilities, making the yacht ideal for family and friends.

Warm wood finishes, refined detailing and the distinctive wooden helm station create an atmosphere of classic sophistication, while modern equipment, comprehensive navigation systems and a full range of onboard amenities ensure a practical and enjoyable cruising experience. Italian flagged and meticulously maintained, Ameli represents a perfect balance between heritage design, contemporary comfort and seaworthy performance.
