BEAM: 8,98m - 29,5 ft

FUEL TYPE: Diesel
ENGINE: 1 Caterpillar C18
533 kw@2100rpm (9165hrs)
FLAG: Cayman Islands
LOCATION: Palma, Spain

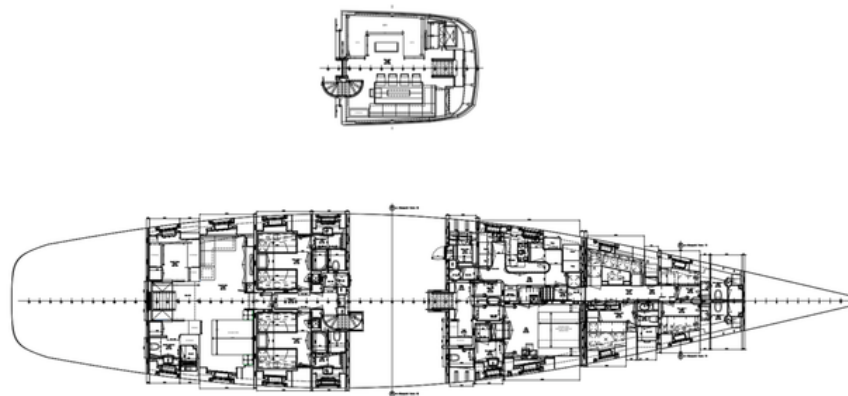

RAVENS is a 43.3-metre aluminium high-performance sloop built by Royal Huisman to a design by German Frers. Designed as a true performance cruiser, she combines lightweight construction, advanced naval architecture and robust engineering to deliver speed, reliability and long-range capability.

Her carbon rig with EC6 standing rigging, efficient deck layout and captive winches ensure precise sail handling and optimized performance in all conditions. Twin helm stations provide excellent visibility and control, while her balanced hull form and deep draft translate into stability, responsiveness and strong upwind performance. The expansive teak decks and well-proportioned cockpit are engineered for safe, efficient sailing yet easily transform into a comfortable space for dining and relaxation at anchor.

INSIDE LAYOUT

Inside, the contemporary interior by Rhoades Young features clean lines and abundant natural light. Accommodation is for up to eight guests in four cabins, including a generous owner's suite with private study, lounge area, en suite bathroom and direct cockpit access. Separate crew quarters for six ensure smooth onboard operations.

With her aluminium hull, proven engineering platform and recent refit, RAVENGER represents a compelling blend of performance capability and modern cruising comfort — a sailing yacht designed to be driven and enjoyed in equal measure.
