DRIFTER CUBE

NAUTOR SWAN 98-002 | 2020 | 29.60 M

The Nautor Swan 98 Drifter Cube is a long-range sailing yacht conceived to deliver confidence, comfort and refinement at sea, reflecting the shipyard's uncompromising approach to quality and engineering. Designed by Germán Frers and delivered in 2020, she is built for discerning owners who value reliability and elegance as much as sailing ability.

WHY HER

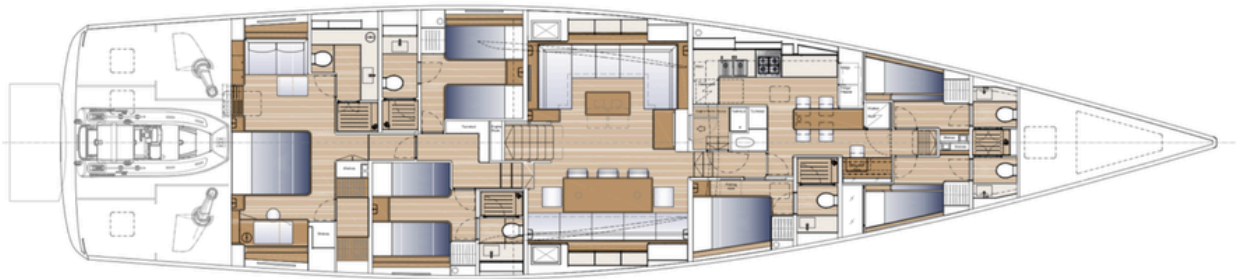

Life on deck is defined by space, safety and intuitive operation. The cockpit and working areas are laid out to support efficient sail management while maintaining a calm and protected environment for guests, whether under way or at anchor.

INSIDE LAYOUT

Her hull and deck are constructed in SPRINT pre-preg carbon fibre with Corecell foam, a technology chosen to ensure structural strength, durability and controlled performance in demanding offshore conditions.

The yacht's profile is clean and purposeful, with balanced proportions and restrained detailing that clearly express the Swan identity.
